

FIRE SAFETY MEETS LUXURY

AQUATECH[®]
Deluxe

THE INVISIBLE WATER MIST FOR LUXURIOUS PLACES

AQUATECH® *Deluxe*

**IS OUR CERTIFIED SOLUTION OF HIGHLY
PRESSURED WATER MIST CONCEIVED
TO PROTECT LUXURIOUS PLACES:
INNOVATIVE AND INVISIBLE.**

Innovative technology, invisible design.

The technology of vaporized water mist Aquatech® Deluxe is the most **innovative**, it is **capable to use smartly** the extraordinary **extinguishing extreme power** of just a drop of water.

In fact, **Aquatech® Deluxe**, **extinguishes rapidly** fires thanks to the production of a very **subtle** and **directable mist** consisting of millions of micro drops of water that are pushed out by high pressure.

Their **duty is triple: cooling down, reducing oxygen and attenuating** the radiant heat.

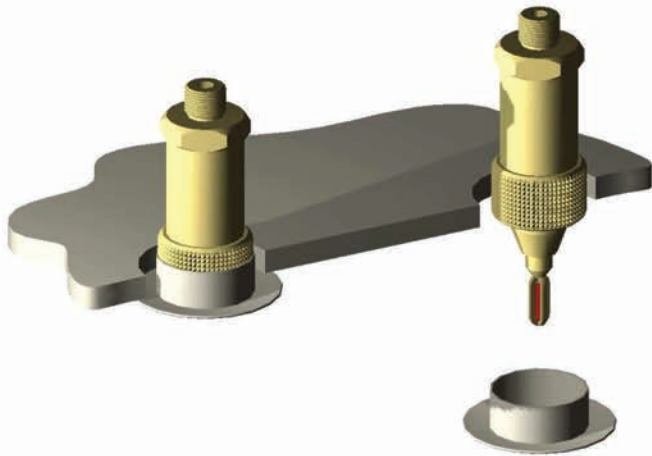

Compared to the traditional water systems, **Aquatech® Deluxe** **reduces** the **water consumption drastically**, the **damages** and the **restoring time**. It is a **100% eco-compatible solution** with **no need of discharging**. What makes **Aquatech® Deluxe** a unique worldwide **product** is its **exclusive, elegant and refined** **Made in Italy design**. Its **innovative invisible technology** with its **“appearing” nozzles**, realized by our company, guarantees **no impact on the architecture**, thanks to their **total integration** in the places where they are inserted.

Aquatech® Deluxe is invisible and appears only when a fire occurs in order to extinguish it.

Aquatech® Deluxe for:

- *luxurious places*
- *historical and cultural buildings*
- *churches and cathedrals*
- *museums and art galleries*
- *shopping malls*
- *hotels and resorts*
- *shops and showrooms*
- *yachts and cruise ships*

AQUATECH® DELUXE: THE INVISIBLE WATER MIST

Reliable and efficient.

Aquatech® Deluxe is characterized by a particular **activation mechanism** in **three phases**: rest, alert, intervention.

When it is **at rest**, Aquatech® Deluxe is **perfectly integrated** in the ceiling therefore **completely invisible** in any location.

During the **alert phase** its **nozzles pop out** of the ceiling and are **ready to work**.

At that point **Aquatech® Deluxe**, only in cases of **real fires** starts its **intervention**.

Functionality and aesthetics.

Made with **high quality materials**, the **Aquatech® Deluxe** “appearing” nozzles, produced in our own company are the **smallest nozzles** on the **international market**. Thanks to their **modern and compact design**, they **guarantee no architectonic changes**, respecting the aesthetics needs in every luxurious place. The **nozzles** can be **personalized** with **materials** and **finishings** in the same colours as the rooms or spaces.

**INNOVATIVE TECHNOLOGY
PERSONALIZED SYSTEM
EXCLUSIVE MATERIALS
MADE IN ITALY DESIGN**
